Trivoulidas, who did his first run-ning over the course which the sol-dier Pheidippides made famous, ran a heady race today. While James Heni-gan, New England ten mile champion, was setting a fairly stiff pace over the first half of the course, the Greek run-ner lay behind, conserving his strength street, six miles out, and at Massa-chusetts avenue, Boston, he passed his Vaughn. The Braves succeeded in taking the measure of the McGrawmen in both games and scored victory in a manner that left no room for an alibi.

A Comparison of British Belgian French Italian Government Internal Loans

Those who have faith in the ability of the great European nations to recover from the devastation and economic difficulties caused by the war should invest in the bonds of those nations.

While exchange rates of the Allied Governments have fluctuated widely on the London, Paris, Brussels and Rome markets, it is only in terms of American dollars that the maximum depreciation has occurred. In other words, Americans are privileged to invest in European Government Loans on a basis which offers the maximum possibilities of profit. As our foreign trade must depend almost entirely on the speedy rehabilitation of foreign exchange rates, and as the surest and quickest way of improving these rates is for Americans to purchase European Government Loans, we submit the following facts, which indicate the speculative possibilities offered to those purchasing with dollars :
